

REMARKS

Claims 1, 2, 4-21, and 23 were pending in the application. The Final Office Action rejected Claims 1, 2, and 4-8, allowed Claims 21, 23, and 24, and objected to Claims 9-20. By this Amendment, Applicants have cancelled Claim 4, amended Claims 1, 5, and 9, and amended the specification at page 1, paragraph 1, and at page 7, paragraph 4. Thus, Claims 1, 2, 5-21, and 23 are currently pending in the application.

Entry of this Amendment is proper under 37 CFR §1.116 because this Amendment: (a) places the application in condition for allowance (for the reasons discussed herein); (b) does not raise any new issue requiring further search and/or consideration because the amendments amplify issues previously discussed throughout prosecution; (c) does not add claims without deleting an appropriate number of claims; and (d) places the application in better form for appeal, should the appeal be necessary. This Amendment is necessary and was not earlier presented because it is made in response to arguments raised in the rejection as indicated by the Final Office Action. Favorable reconsideration is respectfully requested in light of the following remarks.

I. Formal Matters.

1. Applicants thank the Examiner for indicating the allowance of Claims 21 and 23-24.

2. Applicants thank the Examiner for indicating that Claims 9-20 contain allowable subject matter if rewritten in independent form including all of the limitations of the base claims and any intervening claims. Applicants have amended Claim 9 to include limitations recited in Claim 1. Claims 10-20 depend directly or indirectly from dependant Claim 9. Applicant respectfully submits that at least for the reasons explained above, Claims 9-20 are in allowable form. Withdrawal of the objection is respectfully requested.

3. Applicants thank the Examiner for providing the updated issued patent number and patent application serial number information by indicating that Application No. 08/815,361 is now abandoned and that Application No. 08/634,543 is now U.S. Patent No. 6,438,218. In response to the objection to the disclosure, Applicants have amended the specification at

paragraphs 1 and 4 on pages 1 and 7, respectively, as indicated above by the helpful suggestion of the Examiner. Withdrawal of the objection is respectfully requested.

4. Applicants respectfully request that the United States Patent and Trademark Office change the Attorney Docket Number for this application to reflect the correct Attorney Docket Number of 65632-0047, not 680-189.

II. The Claims Define Patentable Subject Matter.

1. Claims 4-5 were rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter of the invention. The rejection is respectfully traversed.

More specifically, the Final Office Action rejects Claims 4-5 for reasons of a lack of antecedent basis with respect to the “said completing step” limitation in line 5 of Claim 4. Applicants have cancelled Claim 4 in order to eliminate the “said completing step” limitation. The other limitations in Claim 4 that are unrelated to the objected “said completing step” have been amended into Claim 1. Claim 5 has been amended in order to properly depend from Claim 1. It is respectfully submitted that Claim 5 is in allowable form. Withdrawal of the rejection is respectfully requested.

2. The Final Office Action rejects Claims 1, 2, and 6-8 under 35 U.S.C. §102(e) as being anticipated by U.S. Patent No. 6,026,087 to Mirashrafi et al. (“Mirashrafi”). The rejection is respectfully traversed.

Although Mirashrafi arguably appears to disclose “In response, changeover bridgeport 165 places a voice call to the PSTN extension of handset 142, and bridges the net and the voice calls, step 216...bridgeport 165 establishes and facilitates the voice call to PSTN extension 143 as described earlier, in step 230 (in order to monitor call quality if changeover bridgeport is not in direct connection with client computer)” (see: Col. 9, line 66 – Col. 10, lines 1 and 28-30; Figure 2B), the device as disclosed in Mirashrafi is directed toward use of a computer to access a packet network, such as the internet, to place a voice call. Applicant also notes that the Advisory Action asserts that *Mirashrafi does not place a voice phone call to a PSTN having an AIN that includes ISCP and CPRs* (see: page 2, lines 9-11).

Conversely, as recited in amended Claim 1, the present invention provides a more direct link between *telephone services and the Internet without requiring a personal computer to establish the connection*. As stated in the previous Office Action response, Mirashrafi needs to be selected by a computer through a web server as it utilizes bridgeports and other devices to execute the packet network call and monitor its quality. Mirashrafi is not responsive, as recited in amended Claim 1, to a placement of a voice *telephone call* to a PSTN including *an advanced intelligent network (AIN) that includes an integrated services control point (ISCP) having stored therein subscriber call processing records (CPRs)*. Thus, Mirashrafi fails to disclose or suggest the Applicant's claimed invention. A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described in a single prior art reference. See MPEP §2131. For at least this reason explained above, independent Claim 1 is allowable over the applied art. Claims 2 and 6-8, which were also rejected under 35 U.S.C. §102(e), depend from Claim 1 and are likewise allowable over the applied art. Withdrawal of the rejection is respectfully requested.

Conclusion

In view of the foregoing, it is respectfully submitted that the application is in condition for allowance. Favorable consideration and prompt allowance of the application is earnestly solicited.

All rejections having been addressed, it is respectfully submitted that the present application is in condition for allowance, and a Notice to that effect is earnestly solicited.
